Knowledge Exchange, Primary Health Care and Nursing: The role of the Primary Health Care Research & Information Service

Amanda Carne, Jodie Oliver-Baxter, Lynsey Brown, PHCRIS

This poster explores how PHCRIS can support nurses in primary health care (PHC) through knowledge exchange with policy, practice, research and consumer stakeholders.

What is Knowledge Exchange?
Knowledge exchange is the process of making best use of research evidence and knowledge to inform policy and practice; to facilitate and nurture collaborative relationships between researchers and decision makers. Different professions and environments are valued, sharing diverse knowledge and skills, working toward common goals, where evidence is jointly shared and interpreted by multiple participants through ongoing, accountable exchanges. 1

PHCRIS supports Nursing through our Knowledge Exchange approach:

- Engage with stakeholders, understand their needs
- Tailor resources to you - the audience
- Verify information with experts
- Environmental scan to keep up-to-date
- Promote publications
- Use multiple paths to disseminate resources
  - Cross-product promotion
  - Social media
  - Email alerts
- Evaluate products so that we continually improve

Extensive Searchable Website: 824 items on Nursing and PHC included between 2003 and 2013

PHCRIS is committed to helping people to find information, share knowledge, build capacity, and exchange ideas about primary health care. www.phcris.org.au  e: phcris@flinders.edu.au

APNA National Conference, 29-31 May 2014, Hilton Sydney, NSW

PHCRIS is a knowledge exchange organisation working in partnership with stakeholders in the PHC sector to inform and influence policy, practice, research and evaluation. PHCRIS helps people to find information, share knowledge, build capacity and exchange ideas about PHC. It offers a diverse range of online products, developed according to stakeholders’ needs, which promote knowledge exchange.
